

Temperature Sensor DTS-135

The DTS-135 is designed to measure current temperature of the accumulator battery and output the measured values via "one-wire" digital channel.

General characteristics	
Supply voltage, V DC	3.0 to 5.5
Max. power consumption, W	0.1
Measurement error, °C	± 0.5
Measurement range, °C	-55 to +125
Protection degree	IP44
Weight, kg	0.13
Mounting	hinged
Note - DTS-135 is delivered with a standard cable and attached to the battery casing with glue or mounting tape.
